BMEDDAC supports 2010 Healthcare Benefits Awareness Month

VILSECK, Germany – The Bavaria Medical Department Activity is supporting the U.S. European Command's 2010 Healthcare Benefits Awareness Month with a variety of community outreach events throughout September.

Healthcare Benefits Awareness Month is an annual EUCOM-wide, joint-service initiative that began in 2006 to inform beneficiaries about their health care benefits.

During September, representatives from each Army health clinic will be available to discuss benefit and medical services information at community events, radio talk shows, town halls and other public venues. They will also coordinate with garrison newspapers and local AFN affiliates to publicize these weekly themes designated by TRICARE Eurasia-Africa: physical health, mental health, dental health, and health care while traveling.

Information about the new TRICARE Overseas Program contract that begins Sept. 1 will also be available in each clinic and at the following community events. TOP contract information is also available at <http://www.tricare.mil/TOPcontract/>.
